

Welcome to Broadview Multi-Care Center

At Broadview Multi-Care Center, our goal is to see our patients get stronger, get better and return home!

We are family-owned and operated and have provided quality rehabilitation and skilled nursing for over 50 years. Let our experienced and compassionate therapists and nursing staff help you reach your goals.

Your comfort and convenience is our priority. Broadview Multi-Care offers newly remodeled private rooms and companion suites that include satellite television and wireless internet. Enjoy our comfortable patient lounges and beautiful outdoor areas. We also offer many engaging activities, a beauty salon and delicious meals and snacks. We are here 24/7 for your short-term rehabilitation and long term care needs and accept admissions around-the-clock!

Skilled Nursing and Rehabilitation

Legacy Health Services
Our Family Caring for Yours

Our goal is to help you return home!

An illness, injury or surgery can impair your ability to move or function on your own. Short-term rehabilitation therapy can help you regain, develop or maintain the strength or skills necessary to live independently.

Based on your condition, your doctor may have prescribed Physical, Occupational or Speech therapy – or a combination of multiple therapies. Our therapists will collaborate with you, your family, your physician and health care team to create and implement a therapy plan tailored to your needs, goals and preferences.

Incorporating activities or hobbies that you enjoy into your therapy program may contribute to your progress and help you maintain ongoing success.

Skilled Nursing

Caring and highly skilled nursing staff are trained to treat a multitude of conditions and ailments including post-hospital and post-surgical care, intravenous (IV) therapy, total parenteral nutrition (TPN), ostomies, wound care, infection management and respiratory conditions. The nursing team is directed by community physicians and their nurse practitioners, and is supervised around the clock by registered nurses. We provide both skilled rehabilitation and long-term nursing services.

Therapy and Rehabilitation

Our advanced therapies are designed to help maximize our patients' independence and functioning. Experienced and compassionate therapists treat a wide range of orthopedic, neurological and general immobility conditions and provide valuable education and safety training for our residents and their families. We provide a full range of physical, occupational and speech therapies up to seven days a week in our modern and spacious therapy centers.

"It has been a pleasure to be a resident here at Broadview Multi-Care Center. The staff is very attentive to my needs and desires. They are the most pleasant people I have ever met."

– Donna B.

Respiratory Therapy

Our experienced certified respiratory therapist oversees your respiratory care upon your arrival from the hospital and helps prepare and educate you for discharge home when appropriate. Our therapist cares for a number of respiratory conditions including respiratory failure, chronic obstructive pulmonary disease (COPD), pulmonary edema, respiratory infections, new tracheotomies and sleep apnea. We have also had significant success in weaning our tracheotomy patients.

Wound Care

Our comprehensive wound care program is directed by a board certified vascular surgeon as well as our own in-house certified wound care nurses. We employ cutting-edge treatments and technologies to treat highly complex wounds including surgical wounds, pressure ulcers, burns, vascular wounds and amputations. We successfully promote progressive healing in most cases.

Outpatient Clinic

Continue your road to recovery at our full-service outpatient therapy clinic. In many instances, you may remain with the same therapists who provided you with wonderful care as a rehabilitation patient.
